

**Evelyn Udedi;  
Research Nurse,  
Malawi**

I am 26 years old, married with one child. I graduated from Nursing College in 2009. I have been a Research Nurse for the past two years working for Malawi - Liverpool - Wellcome Trust in Chikwawa on a malaria research programme. I'm enjoying it immensely. However this is not the end of the road for me, I wish to pursue a Masters degree in Public Health. In the next two years, I'm hoping to get a scholarship as I cannot afford this on my own. If it were so I would have to have up to five or more years of savings - but this will not deter me, I'm very determined.

I have also worked as a Theatre Nurse, for a year, in the Obs and Gynae department, I was the nurse in charge of the Theatre.
